Q1. Fill in the blanks:

a) The ____________ is the natural satellite of the earth.
b) The planet __________________ is the farthest from the sun.
c) Earth is the ______________ planet from the sun.
d) The earth follows a __________ path during its journey around the sun.
e) The axis of the earth runs from the __________ pole to the __________ pole.
f) Earth completes one rotation in __________ hours.
g) An imaginary line around which the earth spins is called the ______________.

Q2. Fill in the missing words.

a) Earth : blue planet :: __________ : Red planet
b) Coldest planet:Neptune:: hottest planet:__________
c) Revolution:________________:: rotation : day

Q3. Correct the given statements:

a) The earth is flat.

b) Stars are the round objects that move around the sun.

c) There are nine planets in our solar system.

d) The different shapes of the moon are called constellations.
Science
Solar System

- With the help of given clues solve the cross word puzzle.

**ACROSS**
1. The collection of eight planets and their moons in orbit around the sun, together with smaller bodies.
4. The third planet from the Sun and also known as the blue planet.
7. A hot ball of glowing gas.
8. Only planet that rotates on its sides.
10. Second Planet from the Sun and of same size as Earth.
11. This planet has the highest mountain in the entire solar system.
12. Dwarf Planet located in the Kuiper belt.
13. Planet having the strongest winds in the solar system.
14. A small icy object that orbits the Sun and has a long tail of gas.

**DOWN**
1. A celestial body orbiting the Earth or another planet.
2. The star at the centre of the Solar System and the most important source of energy for life on Earth.
3. Is the smallest and closest planet to the Sun.
5. Great Red Spot of this planet is the largest storm in the Solar System.
6. Chunks of rocks covered with frozen gases.
9. This planet has the largest moon in the Solar System.
11. Earth’s only natural satellite.
